

Center for Historic Architecture and Design Spring 2008 Courses

UAPP 630 Methods in Historic Preservation

Upper-level field research seminar concentrating on developing graphic, photographic, and narrative skills for architectural documentation and professional skills related to historic preservation. Involves classroom and field sessions.

Tues/Thurs 12:30-2:30 PM, 4 credits, R. Sheppard

UAPP 643 Historic Roadside Architecture

Examines various historic hospitality and retail venues with emphasis on their development throughout this automobile based century. Hotels, motels, diners, fast food and full service restaurants, roadside attractions and retail outlets are discussed as they relate to travel and tourism.

Tues/Thurs 12:30-1:45 PM, 3 credits, P. Sestak

UAPP 667-010 Introduction to Photographing Historic Architecture

Combines principles of architectural photography to the photographic documentation of historic architecture. Emphasizes how to identify and photograph character-defining features of architecture and engineering structures. Reviews photographic protocols of the Historic American Buildings Survey and Engineering Record. Students will learn in the field photographing properties.

Tues/Thurs 3:30-4:45 PM, meets Feb. 12, 14, 19, 21, 26, 28, March 4, 5, 11, and 13 only, 1 credit, D. Ames

UAPP 667-012 World Heritage Sites

Eight hundred and fifty-one properties have been named to the World Heritage List, deemed to embody outstanding universal values for humankind. Explores the history, global strategy, and preservation effectiveness of this UNESCO program. Examines in detail each of the ten primary selection criteria for inclusion in the list. Case studies focus on sites from diverse regional and cultural contexts.

Tues 9-11:50 AM, meets Feb. 12, 19, 26, March 4, and 11 only, 1 credit, C. Reedy

UAPP/GEOG 628 Issues in Land Use and Environmental Planning

Examines theory and contemporary practice in land use and environmental planning with emphasis on creating an integrative framework that balances development demands for urban, suburban, and agricultural land against the needs to conserve and enhance environmental and cultural resources.

Mon 12:20-3:20, 3 credits, D. Ames
