

Writing E-cover Letters

Tips for constructing your electronic cover letter:

- Keep your cover letter short. Brevity is critical. One or two paragraphs - under 150 words- should be sufficient. An e-cover letter is more of a “cover note.”
- What should be included in the E-Cover “Note”? There should be a statement about who you are; what job you’re applying or hoping for; how you heard about this job; and an indication of your knowledge of the organization.
- Take advantage of keywords. Use keywords pertinent to the job you are seeking, and focus on key industry buzzwords and critical skill sets.
- Don’t waste your subject line. Don’t ever leave the subject line of your email blank. Use the subject line to entice the reader into your cover letter.
- Justify your left-hand margins. Avoid indenting and other formatting devices because formatting is often altered in electronic transmission.
- Always use standard cover letter protocol. Just because it’s an email doesn’t mean you should abandon standard business letter writing. Make sure to include a salutation (Dear Ms. Roth) and a standard closing (such as Sincerely or Yours truly). Leave blank lines between paragraphs. Avoid using emoticons, abbreviations, wild colors, etc.
- Never hit “send” without thoroughly spell checking and proofreading your email cover note. Don’t just rely on your email software’s spellchecker. Take the time to really proofread it. A simple typo could undermine a brilliant cover letter. Avoid mistakes!
- Be sure to test your message before sending it to the company. Even if you’re sure your letter is perfect, send it to a friend or another one of your e-mail accounts first and check for the content and style one more time.
