

Film Industry

Entry Level Positions

Production Assistant, Assistant Publicist

The Industry

Traditionally, when people think of the film industry, they think of either the production, technical, or creative end. But there are plenty of technical, artistic, labor, and office positions that play an important part in making movies and television programs. Production involves operations. You might be involved with calculating budgets, hiring the crew, keeping the project moving, scheduling, sorting gear, and purchasing equipment.
