

**HOMEWORK 2**  
**(50 POINTS)**

Develop a Table with at least 5 columns and 6 rows. The columns should contain information about the item bought, # of item, unit cost of item and total cost of item. Also compute the grand total. Use the formula in “Table” Menu to compute the cost. Also write the code to compute the “maximum” or “minimum.”

Also insert a picture/ pictures to make the Table eye-catching.
