

GIS Specialist – Reading/Berks County, PA

Great opportunity for the GIS professional - provide GIS support (map production) for municipal, utility, planning and environmental projects; GIS project management; assist with GIS geodatabase development, mapping analysis and presentations for municipal clients and utilities; future responsibilities could include GIS application development and sales/marketing of GIS services. Must have strong organization skills, initiative to grow GIS skills and stay current with developing technology and an excellent work ethic. Minimum 2+ working with GIS ESRI ArcGIS; demonstrated competency in data processing, data standards and basic to mid-level analysis and mapping skills. 3-6 years professional work experience with a background in environmental, water resources, planning or engineering services important. BS degree in a GIS-related field or science/engineering; master's degree desirable, formal ESRI training classes a plus.

About us....

Creative minds at SSM, passionate about the environment, reclaimed a 1,200 acre Midwest brownfield site for economic development. Open your tap, fill your glass, and think of SSM working to help ensure every community water system across Pennsylvania has a safe supply protected for future generations. Reflect on your meals today; it's very likely you've been nourished by foods we helped bring to your table through our engineering and environmental expertise. And, if you're reading this on the internet, chances are we've helped expand the facilities of a technology company that made this possible.

Whether a client requires extraordinary expertise in a single specialty or the integration of a wide variety of engineering disciplines, SSM is the single source for the solution. We provide services to government, education, healthcare, industrial, and commercial clients in Pennsylvania, across the United States, and in the Caribbean.
