

Peter Edwards is currently the Economist and Social Science Coordinator for the National Oceanic and Atmospheric Administration (NOAA) Coral Reef Conservation Program (National Ocean Service). Prior to that he was the Natural Resource Economist for the Office of Habitat Conservation, National Marine Fisheries Service (June 2009–August 2012).

He holds a BSc in Zoology as well as a Masters in Marine Sciences from the University of the West Indies, Mona Campus (Jamaica). In 2009, he obtained his PhD in Marine Studies (Policy Concentration) from the University of Delaware. His dissertation work focused on the recreational value of Jamaica's coral reefs and beaches. Prior to working at NOAA, he had over 10 years of experience in private environmental consultancy and academia in the Caribbean. His expertise includes ecosystem services, non-market economic valuation, survey development and implementation as well as economic impact analysis.
