Help Us Develop Walking Technology For Youths!

Shriners Hospital for Children® - Philadelphia and the University of Delaware are looking for individuals aged 10-18 with cerebral palsy having crouch gait to participate in a research study that's designing a wearable sensor system (like in your smart phones) to characterize walking ability.

Shriners Hospitals for Children - Philadelphia and the University of Delaware are the performance sites for this Shrine funded study. This study is funded by: Shriner's Grant #20459.
