

# **Instructor's Guide**

**i>clicker with UDSIS  
at the University of Delaware**

# Contents

[Terms to know](#)

[Step 1: Add the i>clicker student registration tool in your Sakai@UD course](#)

In-class Roll Call: Using this option requires a few minutes during class.

Use the i>clicker software to display a window that shows all of the student names in your class (pulled from the roster.txt file). Then, students enter a unique code on their remotes to connect their name to that clicker. This method is recommended only for smaller classes (< 50 students).

#### 4. In-class roll call

Follow these instructions to complete the in-class roll call to connect the students in your roster to the corresponding clicker. Recommended for classes with fewer than 50 students.
