

## i>clicker *Integrate* Admin Set-up Wizard for Canvas v1.1.1

The *i>clicker Integrate Admin Set-up Wizard* is an application that generates configuration files for your instructors. These files help your instructors to easily synchronize i>clicker/i>grader with your institution's Learning Management System (LMS) through i>clicker *Integrate*. Please complete all three steps below to integrate Canvas with i>clicker. There are two ways to setup the External link, depending on your version of Canvas: "Add Tool" as an External App or "Edit External Tool". Instructions for both are provided below.

### I. Add Tool as External App

**Step 1:** Setup i>clicker External Tool (External Apps) in Canvas.

1. Log into Canvas, go to Settings > Apps, scroll down and click on i>clicker.
2. The External Apps page appears. Click "Add Tool" under the i>clicker logo.

The screenshot shows the Canvas 'External Apps' page. On the left is a sidebar with a list of settings: Courses, Users, Statistics, Permissions, Outcomes, Rubrics, Grading Schemes, Question Banks, Sub-Accounts, Terms, Authentication, SIS Import, Admin Tools, and Settings (which is highlighted). The main content area has tabs for Settings, Quotas, Notifications, Admins, Announcements, Reports, and Apps (which is selected). Below the tabs is the 'External Apps' section. It includes a search bar and two buttons: 'View App Center' and 'View Installed Apps'. A text block explains that apps are a way to add new features to Canvas. Below this is a list of apps. The 'i>clicker' app is highlighted. It shows the i>clicker logo, a 5-star rating (1 review), and a description: 'i>clicker is an audience response system used for tracking student answers on pop quizzes, surveys, etc. This app lets you run and track your i>clicker assessments from within the learning platform.' Below the description is a note about the involvement of campus IT staff. At the bottom of the app card, there are details: Extensions: Course Nav, Average Rating: 5.0, Privacy Level: Public, and Education Level(s): 7th-12th Grade, Postsecondary. A red box highlights the 'Add Tool' button under the i>clicker logo.

3. The "Add App" screen appears. Enter the fields as follows, then hit "Submit".
  - a. Name: i>clicker
  - b. Consumer Key: IC001
  - c. Shared Secret: 001
  - d. Canvas Domain: <enter your Canvas domain here> (example: <https://macmillan.instructure.com/>)
4. The i>clicker App will then appear in your list of External Apps.

**Step 2:** Generate i>clicker *integrate* configuration files for your LMS:

1. Launch the Admin wizard application by double-clicking either *CMS Integrate Administrator Setup*.
2. Select Canvas from the drop-down menu on the opening screen and click the **Next >** button.

i>clicker Integrate Admin Setup Wizard

### Welcome to i>clicker Integrate Admin Setup Wizard

This admin tool configures i>clicker Integrate to allow instructors to easily synchronize i>clicker with your LMS. Completing all the steps in this setup wizard will generate files that you will then distribute to your institution's instructors.

To get started, please indicate the LMS your institution is using.

Canvas

**Reminder:** In order to deploy i>clicker options as an external tool link you will need an XML file, which will be provided by i>clicker. Please refer to the user manual for details or contact support with questions.

Next > Exit

3. Provide details about your LMS by completing the parameters on the screen. The information you need to provide depends on the LMS selection made in the previous step. Click the **Finish** button when you are done.

i>clicker Integrate Admin Setup Wizard

### Provide details about your campus LMS

LMS Description: Macmillan Canvas  
This is the text that instructors will see as their LMS option when they synchronize with Integrate Wizard.

Campus LMS URL: https://macmillan.instructure.com/

Configure for Single Sign-On? ☒ No ☐ Yes

Authentication Token  
[What is this?](#)

< Previous Finish Exit

- a. Enter your Canvas LMS URL. NOTE: this URL must match the URL in Step 1 exactly. (example: https://macmillan.instructure.com/)
  - b. For Canvas integration, you will need to supply your Canvas Access Token, or Authentication Token. Your Access Token can be obtained under Settings in Canvas.
4. A confirmation message will indicate that the information provided was successfully authenticated and the set-up files are ready for distribution to your instructors. Click the **Exit** button to dismiss the window and quit the program.

### Step 3: Distribute i>clicker *Integrate* files to your instructors:

1. After running the *Admin Set-up Wizard*, distribute the following files to your instructors:

For Instructors Using i>clicker Windows	For Instructors Using i>clicker Macintosh
CMS Integrate Wizard.exe CMS_Wizard.xml Config.xml CMS Integrate Wizard Libs (folder)	CMS Integrate Wizard.app CMS_Wizard.xml Config.xml

2. Direct your instructors to place these files in the **Resources** sub-folder of their **iclicker Win** (Windows) or **iclicker Mac** (Macintosh) program folder.
3. Make the LMS-specific **Instructor User Guide** available to your instructors. This user guide is included with the *integrate* download for each LMS and can also be downloaded separately from the **User Guide** section of the iclicker.com website.

Contact us at [contact@iclicker.com](mailto:contact@iclicker.com) for additional support with *Integrate* and LMS-related issues.

## II. Edit External Tool

**Step 1:** Contact i>clicker at [contact@iclicker.com](mailto:contact@iclicker.com) for XML file used in Step 2.

NOTE: You will need the URL of your Canvas LMS before contacting i>clicker.

**Step 2:** Setup i>clicker External Tool (External Apps) in Canvas. Log into Canvas, go to Settings > Apps > Add New App. The configuration type used is “Paste XML”.

Name is “i>clicker”.

Consumer key is “IC001”.

Shared secret is “001”.

Configuration type is “Paste XML”.

Paste XML Here: here you will paste the XML block provided by i>clicker in Step 1.

Click Submit.

Next, follow Steps 2 and 3 from “Add Tool” instructions above.
