

Blueprint Communities Delaware

Homework Assignment #1

Homework Assigned at Orientation Session on March 10, 2008

Due Sunday, April 6, 2008

As has been discussed, it's expected that each of the nine Blueprint Community teams will involve and engage other stakeholders throughout their entire planning process. Such involvement and engagement will not only provide useful information and ideas, but it will also help build community trust and cohesiveness which will in turn help the community develop a shared vision of its future. It will also build the support needed to actually implement the projects and programs which emanate from the planning process.

Therefore, this first assignment asks each community team to:

1. Identify what community stakeholders (in addition to those represented on the planning team) should, in some way, be involved in the planning process.
2. Describe the ways in which your team might make outreach to these stakeholders and actually engage them in the planning process.

Please keep your completed assignment to no more than 2 typewritten pages with 1.5 line spacing, 1-inch margins, and 12-point font.

Please email your completed assignment by Sunday, April 6th to Prof. Jabbar-Bey (jabbarra@udel.edu).
