

ART THERAPY EXPRESS PROGRAM, INC.

For over 10 years our visual and expressive art programs have promoted creative self-expression for individuals with intellectual, physical and emotional disabilities of all ages.

Our newly adapted “Kaleidoscope” art studio has been equipped with assistive technology (rotating tables, moving easels, holding devices, etc.) to make the arts accessible for individuals of all abilities. This exciting environment has been made possible by a partnership between Art Therapy Express Program, Inc., New Castle County Community Services and Delcastle Technical High School.

Art sessions are designed exclusively for individuals and school groups with special needs and non-profit organizations in an inclusive setting. Art workshops, community outings to the Delaware Art Museum and a Saturday morning open art studio introduce both visual and expressive arts.

We remain dedicated to building a bridge between our students’ capabilities and their imaginations by providing an enriching environment where many with an array of challenges can speak through the arts.
