

CDS Lunch and Learn Series

April 11, 2011

“Enhanced Living Through Visual Assistive Technologies”

The Center for Disabilities Studies continues its Lunch and Learn series with a presentation by CDS Director Beth Mineo and DATI Assistive Technology Specialist Marvin Williams. They will share information about the vast array of visual assistive technologies—ranging from simple, non-electronic items to computer-based tools—that are available to enhance productivity, self-sufficiency and quality of life for individuals with full or partial vision loss.

Our presenters will also review the impact that DATI’s BOLD (Borrow-to-Own Low-vision Devices) has had on Delawareans with vision loss. The BOLD Program, made possible through support from the Tobin Foundation, enables Delawareans with visual impairments to access relatively low cost (\$100 and under) devices following a trial use period to ensure that the product meets their needs. DATI—the Delaware Assistive Technology Initiative—is a program of the Center for Disabilities Studies.

Lunch and Learn Details:

Date and Time: Monday, April 11, 2011, 12 noon–1 p.m.

Location: Center for Disabilities Studies, Room 132A, 461 Wyoming Rd., Newark

Registration: Reply to Michele Sands, msands@udel.edu or 302-831-3038.

Please indicate if you need an accommodation.

You’re welcome to bring a bag lunch. Water will be provided.

Future sessions: May 9 – Early Detection of Developmental Disabilities

June 7 – Health Care Transitions
