

DA Watson Group Journal Reading List

Below are the list of journals that are relevant to the research going on in the group. Each group member has been assigned one or more journals to keep track of and report back to the group when paper of interests are published. This will be presented in a weekly update, and should include a graphical abstract. For journals in red, please only include articles of high importance or novelty, or that are directly relevant to on-going research in the group (ie, please be very selective with these journals). Journal assignments will be rotated periodically.

Journals in bold are very important journals that everyone in the group should keep up with individually.

Freq.	Journal	Link	Assignment
Weekly	Science	http://www.sciencemag.org/current.dtl	Sara/Neo
	Nature	http://www.nature.com/nature/index.html	Don
