

Some of Our Most SUCCESSFUL EMPLOYEES

Are in Diapers.

Others are in toothpaste, laundry detergent, razors, shampoo, paper towels, you name it. At P&G, we hire top Science and Engineering talent and quickly give them the opportunity to make meaningful contributions to our global, \$80 billion business. With nearly 300 brands from Pampers® to Tide® and Crest®, P&G careers offer exciting new challenges, tremendous growth and support, and a chance to touch and improve lives daily.

The Procter & Gamble Company will be interviewing on campus for entry-level full-time openings for PhD and postdoctoral scientists. These positions are in Research and Development in long-range research and technology development to shorter-range product and process development.

In order for you to be considered for a campus interview, you must meet the following requirements:

- Be within 9-12 months from graduation or currently on a post doc assignment in one of the following areas:
 - Biological Sciences (Cell Biology, Microbiology, Molecular Biology)
 - Biochemistry or Chemistry (Analytical, Inorganic, Organic, Physical)
 - Engineering (Biomedical/Bioengineering, Chemical, Materials Science, Mechanical)
- Successfully complete the online application at ExperiencePG.com (select the job search option and type in Job number RND00001911).

Apply online through the Career Service Center/Blue Hen Jobs

Resume submission deadline: September 23, 2010

Information Session: October 5th, 5-6 pm, Perkins Student Center Alumni Lounge

On campus interviews: October 6th & 7th, 2010

A NEW CHALLENGE EVERY DAY.™
Daily. Globally. Personally. Professionally.
