To apply, please email your resume and cover letter to itwd-internship@udel.edu

**Overview:** The IT Web Development (IT-WD) Department is responsible for the development, implementation, and maintenance of institution-wide, web-based information services that support the University's core business processes.

**Job Description:** We are seeking a highly motivated and skilled individual to help support University business systems. The selected candidate will apply analytical and technical skills to complete programming assignments, including routine maintenance of existing systems and implementation of accessibility standards.

**Training:** We will provide on-the-job training, programming and procedural guidance, and mentorship on the best practices in web development.

**Qualifications:**
- Currently pursuing a Bachelor's degree in Computer Science or a related discipline
- Experience in Java programming
- Basic understanding of client and server-side concepts in web based applications
- Basic understanding of object-oriented programming concepts
- Knowledge of SQL database systems
- Basic understanding of web programming concepts including JavaScript, JQuery, HTML, CSS
- Detail oriented and passionate about software development
Preferred skills and knowledge:
- Basic knowledge of version control practices like SVN
- Experience working in a Linux-based environment
- Basic knowledge of Spring framework
