

## SPSS 16.0.2 "74684" Patch

*If attaching an SPSS 16 .sav file to an e-mail message in a web browser (e.g., Safari, FireFox) causes the browser to crash, install the attached "schema.strings" file as directed below.*

1. Log onto your computer with administrator privileges.
2. Save the [schema.strings](ftp://ftp.spss.com/pub/spss/mac/schema.strings) file (ftp://ftp.spss.com/pub/spss/mac/schema.strings) to a temporary location on your hard drive.
3. Copy this file to  
/Applications/SPSSInc/SPSS16/SPSS16.0.app/Contents/Library/Spotlight/SPSSSpotlight  
Importer.mdimporter/Contents/Resources/English.lproj/

### **NOTES FOR STEP 3:**

A detailed description for performing step 3 follows:

- a) Locate the Applications/SPSSInc folder.
- b) CTRL-click the SPSS16 icon and select "Show package contents".
- c) Double-click the Contents folder, Library folder, and Spotlight folder.
- d) CTRL-click the SPSSSpotlightImporter.mdimporter icon and select "Show package contents".
- e) Double-click the Contents folder, Resources folder and English.lproj folder.
- f) Replace the English.lproj folder's schema.strings file with the newer, downloaded schema.strings file by dragging the newer file into the folder.

After closing all of the windows, you may delete the copy of schema.strings that remains on your desktop.
