

# ITUG DELAWARE

## Instructional Technology Users Group -- Delaware

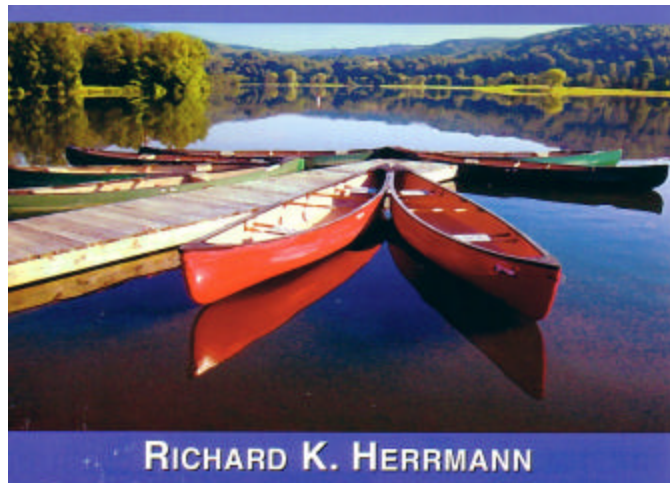

Next Meeting: **Thursday, May 8, 2003**

5:00 - 7:00 pm

University of Delaware, Willard Hall, Room 207

Speaker: Richard K. Herrmann

Topic: Digital Concepts in Traditional Art

Richard Herrmann, partner in the law firm of Blank Rome, has gone from the digital courtroom to the digital darkroom. Herrmann, known in the Delaware legal community as a catalyst in legal technology, has combined his digital skills with his photographic talents. Photographs (originals taken by Mr. Herrmann) are digitally enhanced on the computer, and now compete with the more traditional forms of art. "The more closely you study an image," says Herrmann, "the more difficult it is to distinguish it from a watercolor or dry brush." Mr. Herrmann has just completed a showing of his work at the Carspecken-Scott Gallery in north Wilmington.

Mr. Herrmann photographs a broad range of subjects and will share information on his techniques, cameras, software, and experiences.

Come join us! As always, there is no charge for attending.
