<http://www.udel.edu/physics/csapt>.

**Chesapeake
Section
of the**

American Association of Physics Teachers

Our purpose is "...the advancement of the teaching of physics, the professional advancement of the teachers of physics at all levels, and the furtherance of the appreciation of the role of physics in our culture."

Our small meeting size (<80) creates a welcoming atmosphere for all attendees. Come and meet physics teachers from regional high schools, community colleges, and colleges and universities. Share your experiences, make new contacts, and leave with innovative ideas.

Our Saturday presentations are wide ranging—exhibitions of new demonstrations, discussions of technology in the classroom and topics in assignments, assessments, and research. Best Paper Prizes are awarded in four categories: 4-Year University/College, High School, 2-Year College, and Student.

First time High School attendees will have their registration fee waived. So come and join us! We look forward to meeting you.

For more information about our Section including future meetings please visit <http://www.udel.edu/physics/csaapt>.

To add your name to the email list please contact our Communications Officer Rhett Herman at rherman@radford.edu.
