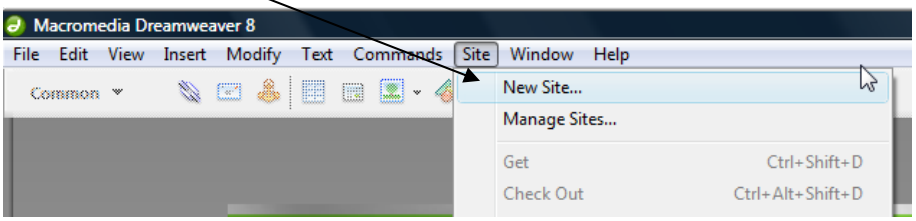
Instructions for Defining your Site in Dreamweaver

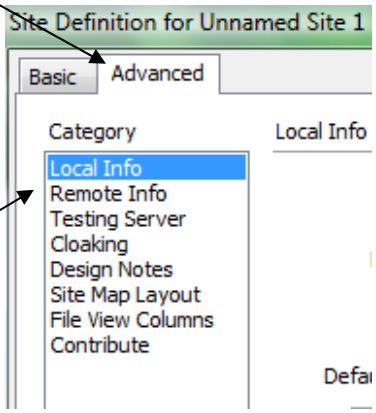
On webs.oet.udel.edu

1. Open Dreamweaver.
2. From the Menu Bar Select **Site-New Site…**



3. At the top of the Site Definition Window, Select the **Advanced Tab**
4. In the **Site Name** box, provide a name to this site (can be anything)
5. In the **Local Root Folder** box, Click on the Folder Icon to the right and select the folder you will store your web pages for this site.
6. On the left side of the Site Definition Window, Select **Remote Info**.
7. In the "**Access:**" pull-down menu, click the down arrow and select "FTP".
8. In the "FTP Host:" block, type the following:

   webs.oet.udel.edu



9. In the "Host Directory:" block, type the following: ***yourlastname***
10. In the "Login:" block, type the following: dcet07
11. In the "Password:" block, type the following: _____

(If you check the "Save" box, your password will be saved on your local computer.)

12. Click the "OK" button at the bottom of the window. The window will close.
13. Click the "Done" button at the bottom of the Edit Sites window. The window will close.

The world can access your website by browsing to

webs.oet.udel.edu/dcet07/*yourname*

NOTES TO REMEMBER:

- Your first page in the folder should be called: index.html
- No spaces in your filenames!
- No upper case letters in your filenames!
- Keep all your web page files separate from your other documents.
- These sites will only be available until October 1, 2007.
