Join UD's Institute for Public Administration (IPA) for an engaging conversation introducing the Living Lab approach to addressing real-world community challenges. This session will highlight how temporary, low-cost transportation demonstrations can be used to test ideas, gather feedback, and build momentum for lasting change.

Potential partners will learn how IPA collaborates with local governments, organizations, and residents to design people-focused solutions and create spaces that work better for everyone. Whether you're curious about piloting new ideas or ready to take the next step toward partnership, this webinar will show how Living Labs can bring innovation and impact to your community.

Contact Matthew Harris at [mlharris@udel.edu](mailto:mlharris@udel.edu) with questions about this event.
