*Weight of pickles harvested by machine before grading. Length of plot=583 ft.

^a Marketable Yield = Total Yield- % Crooks & Nubs

^b % pickles 2.00 to 2.06 inches in diameter

^c % pickles 1.75 to 2.00 inches in diameter

^d % pickles 1.50 to 1.75 inches in diameter

^e % pickles 1.25 to 1.50 inches in diameter

^f % pickles 1.06 to 1.25 inches in diameter

^g % pickles 0.88 to 1.06 inches in diameter

^h % pickles 0.38 to 0.88 inches in diameter

ⁱ Length/Diameter Ratio – 10 pickles from the 3A size, measured for total length and then total diameter. Length is then divided by the diameter.
