The graduate program in the Department of Earth Sciences in the University of Delaware College of Earth, Ocean and Environment involves a dynamic and diverse group of faculty and students investigating many aspects of the earth sciences. Individual lab groups foster close connections between faculty advisors, post-docs, and graduate students. With faculty interests ranging from geomicrobiology to geodynamics to groundwater, the opportunities for research are broad. And the impact of your research can be significant.

PROGRAMS

Geological Sciences (MS, PhD)
Water Science and Policy (MS, PhD)
Minerals, Materials and Society Certificate

CURRENT RESEARCH
Aqueous Biogeochemical Processes
Earth Surface Processes
Geodynamics
Geoscience Education

FACILITIES AND RESOURCES
Laboratories for low-temperature geochemistry, geomicrobiology research; isotope mass spectrometry facility; computational facilities for groundwater and nanogeochemical processes modeling; radiogeochemistry; water, rock, and sediment sample processing facilities, and specialized remote sensing and geophysical equipment.

Application information and process is online at grad.udel.edu/apply, but applicants are encouraged to contact potential advisors directly prior to application.

Faculty information and research interests on reverse.

EARTH SCIENCES FACULTY & RESEARCH INTERESTS

ELIOT ATEKWANA
(Western Michigan University, 1996)
Geochemistry; hydrogeology.
eatekwan@udel.edu

ESTELLA ATEKWANA
(Dalhousie University, 1991)
Biogeophysics; tectonics and continental rift formation; near surface geophysics; biogeophysics; tectonophysics; extensional tectonics.
a.tekwana@udel.edu

CHANDRANATH BASAK
(University of Florida, 2011)
Chemical oceanography; paleoceanography; environmental geochemistry; non-traditional isotopes.
cbasak@udel.edu

CLARA CHAN
(University of California, Berkeley, 2006)
Geomicrobiology; metagenomics; microbial ecology and physiology; biomineralization; biofilms; bioremediation; environmental mineralogy and geochemistry.
cschan@udel.edu

COLTON LYNNER
(Yale University, 2015)
Seismology; geophysics; tectonics.
clynner@udel.edu

JOHN A. MADSSEN
(University of Rhode Island, 1987)
Continental shelf and estuarine geophysics; Side-scan sonar in fisheries research.
jmadsen@udel.edu

SUSAN MCGEARY
(Stanford University, 1984)
Continental lithospheric structure; seismic investigations of continental margins; environmental geophysics.
smcgeary@udel.edu

HOLLY MICHAEL
(Massachusetts Institute of Technology, 2005)
Coastal groundwater dynamics; groundwater flow and solute transport modeling; groundwater-surface water interaction; water supply sustainability; geostatistical modeling.
hmichael@udel.edu

MICHAEL A. O’NEAL
(University of Washington, 2005)
Geomorphology; how Earth’s surface is molded by climatic, geologic, and anthropogenic processes over diverse timescales as detected by laser mapping systems, remotely sensed imagery, traditional instrument surveys.
oneal@udel.edu

JAMES PIZZUTO
(University of Minnesota, 1982)
Fluvial geomorphology; use of radioactive isotopes to document sedimentation patterns; transport and fate of contaminated sediments.
pizzuto@udel.edu

NEIL C. STURCHIO
(Washington University, 1983)
Environmental isotope geochemistry; mineral-fluid interactions.
sturchio@udel.edu

ADAM F. WALLACE
(Virginia Polytechnic Institute and State University, 2008)
Low-temperature aqueous geochemistry; geobiology and biomineralization; geochemical modeling.
afw@udel.edu

JESSICA WARREN
(Massachusetts Institute of Technology-Woods Hole Oceanographic Institution, 2007)
Plate tectonics; mantle flow and rheology; high-temperature geochemistry.
warrenj@udel.edu
