The field of Materials Science and Engineering encompasses the broad disciplines of physics, chemistry, biology, and engineering by providing a platform for multidisciplinary activities across these fields. It integrates the role of research and education to develop and prepare students for today's challenges while giving them the breadth, perspective, versatility, and vision to adapt to the changing environment of tomorrow. The department's major research efforts involve both “soft materials” consisting of polymers and biomaterials and “hard materials” consisting of electronic materials, inorganic and organic thin films, surfaces and interfaces, nanoscale materials, and composites. There are ongoing fundamental studies of self-assembly in block copolymers, crystallization, morphology, and the synthesis and characterization of advanced polymeric materials. The area of biomaterials brings together research in materials chemistry and biology with an emphasis on tissue engineering, responsive gels, biosensors, and drug delivery.

RESEARCH AREAS OF FOCUS

POLYMER SYNTHESIS
SUSTAINABILITY IN POLYMERIC MATERIALS
COMPOSITES
BIOLOGICAL AND BIOMEDICAL MATERIALS
PHOTONICS
PHOTONIC MATERIAL
NANOMATERIALS
ELECTRONIC MATERIALS
INORGANIC-ORGANIC HYBRID MATERIALS
SELF-ASSEMBLY OF MATERIALS
THIN FILM MATERIALS
MATERIALS CHARACTERIZATION

**PREREQUISITE REQUIREMENTS – MMSE DEGREE**
A student entering the Materials Science and Engineering Graduate Program normally possesses a bachelor's (or higher) degree in a physical science or engineering discipline. A successful candidate for admission would minimally have taken courses to the following levels: multivariable calculus, physics, and chemistry. In addition, courses in materials science, thermodynamics, phase transformations, and physical and organic chemistry are considered very useful.

**ADMISSIONS REQUIREMENTS – MMSE DEGREE**
Admission requirements are normally (1) completion of a bachelor's degree with a GPA of at least 3.2, (2) three excellent letters of recommendation from faculty or scholars, and (3) TOEFL score of 79 or higher. GRE is not required. Admission decisions are made by a committee of the Materials Science and Engineering faculty.

**MMSE DEGREE CURRICULUM**

**OPTION 1 – MASTERS THESIS DEGREE**
The Masters (MMSE) Thesis degree requires 30 total credits (24 credit hours of course work and 6 credits of MSEG869 – master’s thesis work on a research topic approved by your advisor). Of the 24 credits (8 courses) of course work, 9 credits must be three required core courses, another 6 credits are chosen from an approved list of 5 non-core courses, and an additional 9 credits of technical electives must be chosen from the same approved list of 5 non-core courses or other courses approved by the student's research advisor.

**OPTION 2 – MASTERS NON-THESIS DEGREE**
The Masters (MMSE) Non-Thesis degree requires 30 total credits of course work. Of the 30 credits (10 courses) of course work, 9 credits must be three required core courses, another 6 credits are chosen from an approved list of 5 non-core courses, and an additional 15 credits of technical electives must be chosen from the same approved list of 5 non-core courses or other courses approved by the student's academic advisor. The non-thesis degree is offered primarily for off-campus or part-time students, but is available to full-time students with permission from the MSEG graduate committee.

**APPLY ONLINE**
For more information about graduate admission and to apply online, visit the Graduate College at https://grad.udel.edu/apply/.

**PROGRAM INFORMATION**
