The flexible curriculum in the masters of science in business analytics and information management allows you to design a program of study that suits your career goals. You can choose a business analytics focus, an information management focus or a blend of the two. Designed for both working professionals and full-time students, masters in business analytics and information management students will gain the skills and knowledge to be leaders in data-driven decision making.

This program qualifies as a Science, Technology, Engineering, Math (STEM) Optional Practical Training (OPT) program, which allows international students in a technical field to apply for a 24-month extension to their OPT period.
FACULTY EXPERTISE
Lerner faculty who teach in the masters program bring a combination of academic and real-world experience to the classroom providing fresh insights on the role of business analytics and information management in the corporate environment.

CAREERS
As a graduate of Lerner's M.S. business analytics and information management program, you will enter a job market with diverse career options, such as business analyst, IT consultant, systems analyst and management analyst. Our graduates have joined organizations such as American Express, Bank of America, BlackRock, ChristianaCare, Deloitte, EY, Gore, JP Morgan Chase, and Tata Technologies.
