

M.S. IN ECONOMICS AND APPLIED ECONOMETRICS

PH.D. IN ECONOMICS

The Lerner College's graduate programs in economics focus on developing applied research skills that are increasingly in demand in consulting, business, government and academia. Because of our small class sizes, you can count on receiving the personal attention of our highly qualified faculty. Our programs emphasize applied, policy-oriented economics and the development of strong econometric skills. Economics that really matters: student-centered and research-focused. That's the Lerner difference.

UNIVERSITY OF DELAWARE

**LERNER BUSINESS
& ECONOMICS**

ECONOMICS: M.S. AND PH.D

30
CREDITS

MASTER OF SCIENCE IN ECONOMICS AND APPLIED ECONOMETRICS

All students complete courses in microeconomic and macroeconomic theory and econometrics, including at least three of the five graduate econometrics courses offered.

Students also take electives in a wide range of fields, such as international monetary economics, economic development, labor economics, public finance, industrial organization and regulation, financial economics and natural resource and environmental economics.

23
CREDITS

PH.D. IN ECONOMICS
