University of Delaware Human Resources
Dear Colleagues,

Congratulations on this wonderful moment in your career, whether you're celebrating a milestone anniversary or embarking on a new life in retirement. Truly, you are what makes the University of Delaware great, and Eleni and I are thrilled to recognize your many years of service to our community.

The experience and perspective that you have brought to your job is incredibly valuable. Whether you are faculty or staff, whether you work directly with our students or you work behind the scenes, you make the UD experience possible. You make the campus vibrant and beautiful. You make it exciting and intellectually stimulating. You make it safe and comfortable and welcoming. In short, you make it a home for our students and our fellow employees.

You are the reason I am so excited about everything we are accomplishing here at UD and why I am so optimistic about our shared future. Working together, there's nothing we can't achieve.

Once again, thank you—for your many years of service, for your role in shaping our community, and for adding to the University of Delaware's legacy of excellence. I consider it a privilege to work with you.

Sincerely,

Dennis Assanis, President
50+ Years

John Burmeister, Ph.D.

Chemistry & Biochemistry

My 55-year love affair with the U of D began in December 1963, when I arrived for my interview. I was so taken with the promise inherent in the Chemistry Department and the University that I canceled all my other interviews! I have never regretted that decision, and was delighted to have been a part of UD’s metamorphosis from a small college with a fledgling graduate program into today’s Research I power. Along the way, the numbers piled up: a 30-year research career, during which I mentored 35 graduate students and 42 undergraduate research students; 42 years as our Department’s first Associate Chair for Undergraduate Studies; 30 years as the Chair of our Athletics Governing Board, 26 years as the second Alumni Distinguished Professor. My most important number, however, is the 59 wonderful years that Aileen and I have been married. Professionally, my one true love has always been teaching and advising, and my greatest joy has been found in seeing how well, collectively, and I personally, have impacted the lives and careers of our students.

Stanley Sandler, Ph.D.

Chemical & Biomolecular Engineering

Stanley J. Sandler, the H. B. duPont Professor Emeritus of Chemical and Biomolecular Engineering, joined the University in 1967, and has been department chair and interim dean of the College of Engineering. He has mentored many students, published more than 400 refereed research papers, and written or edited 7 books, including a textbook, now in the 5th edition. He has been editor-in-chief of the American Institute of Chemical Engineering Journal, and has held visiting professorships at the Universities of Melbourne and Queensland in Australia, the Technical University of Berlin, Imperial College (London), Harbin Institute of Technology (China) and the National University of Singapore. He has won many U.S. and international awards, and is a member of the U.S. National Academy of Engineering, and the National Academy of Sciences. His research became focused on the nutritional needs of bivalves grown in controlled environment systems, and for processes for the destruction of U.S. weapons with nerve agents, and the cleanup of contaminated sites from nuclear weapons production. His late wife and three children earned degrees from the University in education, business, nursing, electrical engineering and computer science. His present wife is an emeritus professor from the UD English department. His local activities included initiating a group that was successful in blocking the damming of White Clay Creek, and led to the formation of the Delaware Chapter of the Sierra Club.

Barbara H. Settles, Ph.D.

Human Development & Family Sciences

My past year at the University of Delaware has been interesting and exciting. I had the opportunity to review the history of the faculty senate and present a talk honoring the 50th anniversary of the senate as well as chairing the senate international committee. My professional travel and presentations included cochairing the Groves Conference on Marriage and Family in Kennett Square, PA with Dr. Debra Berke and Dr. Karen Doneker, presenting at Family Section, International Sociological Association, and presenting Family Conference in Rhodes, Greece and the National Council on Family Relations in Texas. I spent time in Florida with my family at Thanksgiving and in the winter. My picture is from a short trip to New Orleans at New Year with my oldest son Alex. For excitement, however, putting my two classes up on Zoom and Canvas at spring break for the second half of the semester is hard to beat. Both classes had a majority of seniors and it was great to help them finish and graduate. For now, I continue sheltering in place. I look forward the reopening in the fall.

Carolyn Thoroghgood, Ph.D.

Food Science and Nutrition

Carolyn Thoroghgood joined UD in 1968 as an Assistant Professor in Food Science and Nutrition. As her research became focused on the nutritional needs of bivalves grown in controlled environment systems, she moved to the newly formed College of Marine Studies in 1974. She progressed through the academic ranks and served in many administrative roles, including her service as the College’s Dean for 20 years. In September, 2004, Dr. Thoroghgood was recruited to become the Vice Provost for Research and Graduate Studies; however, she always promised herself she was going to return to a full-time faculty position and did so in Spring, 2010. Once back on the faculty, she specifically asked to teach freshmen and non-science undergraduates about the ocean, although she still advises graduate students in the School of Marine Science and Policy. Her research and service are now focused on coastal ocean observation. For 16 years, she has served as the Chair of the Board of Directors for the externally funded, UD–based Mid-Atlantic Regional Association Coastal Ocean Observing System, covering the region from Cape Cod, MA to Cape Hatteras, NC for the U.S. Integrated Ocean Observing System.

Jerome R. Lewis, Ph.D.  
Biden School of Public Policy & Administration  

Jerome R. Lewis, Ph.D. is the Associate Professor and Acting MPA Director, Joseph R. Biden, Jr. School of Public Policy & Administration. In 1973, Dr. Lewis founded and became the director of the Institute for Public Administration (IPA), a research center in the Biden School. In the mid-1970s, he collaborated on the proposal for the Master of Public Administration (MPA) program and became its first director. It is now one of the top programs in the nation. Our MPA graduates include Delaware’s current governor, city managers, state cabinet secretaries, and state legislators. Dr. Lewis takes pride in mentoring students on the merits of public service. Under his leadership, IPA engages students in experiential learning, known as “The Delaware Model,” this guiding philosophy equally involves faculty, professional staff, and students in public service and research projects that make a difference in the lives of citizens in Delaware and beyond. In 1982, he created the Legislative Fellows Program as a partnership between the University and the Delaware General Assembly. In 2021, the program will celebrate 40 years and boasts more than 300 alumni who are working in local, state, and federal governments, and nonprofits across the country. In 2009, he was recognized by the legislature for “40 years of distinguished service to the University and the Citizens of the First State.” He has received the following honors for his work: 1998—National Association of School of Public Affairs & Administration’s Elmer B. Staats Public Service Career Award; 2004—Ratledge Family Award for Delaware Public Service; 2011—Common Cause Delaware’s Public Service Award; 2017—American Society of Public Administration’s Elmer B. Staats Lifetime Achievement Award.

George Miller, Ph.D.  
College of Arts and Sciences  

In August 1969 at age 26, I arrived in Newark, Ph.D. in hand, with two children. We rented half of the George Evans House (at the corner of Main St. and South College) for $110 a month, all utilities included. As an Assistant Professor in the English Department, I taught the regular load of 3-3. My first office was in the dining room of a house on South College Avenue. Classes were either MWF or TRS. The English department had no adjunct faculty only full-time positions. Undergraduate enrollment was about 6,500, although like most colleges and universities at the time, Delaware had seen campus protests over the Vietnam War. Following the assassination of Rev. King, the National Guard had occupied Wilmington for nine months. Hired as a specialist in Renaissance literature and language, I taught several English literature courses: 13-year history as a Department administrator serving under a variety of titles, 1983–1986 Dean (acting), 1985–2019 Director of Composition, Director of Undergraduate Studies, Director of the Writing Program, Associate Chair (3 times), and Chair of the Department. Of my eight children, five graduated from UD; three have Master’s from here, the other three took advantage of the tuition exchange to earn degrees from smaller liberal arts colleges.

Tru-Wei Chou, Ph.D.  
Mechanical Engineering  

Dr. Tru-Wei Chou is the Unidel Pierre S. du Pont Chair of Engineering at UD. He joined Mechanical Engineering Department in 1969 after receiving the Ph.D. degree in materials science from Stanford University. He has authored over 388 archival journal papers and book chapters with a total Google Scholar Citation of nearly 40,000. Dr. Chou is the author of the book, Microstructural Design of Fiber Composites, Cambridge University Press (1992). In 1985 he was co-author of Composites Material and Their Use in Aerospace Systems, Elsevier Applied Science, London (1975), he was editor of several books. A Fellow of ASME, ASM, ASCr, TMS and AIAA, and a recipient of the Charles Russ Richards Memorial Award, the Worcester Reed Warner Medal, and the Nadai Medal of ASME, the Albert Sauveur Achievement Award of ASM International, the Distinguished Research Award and the ASC/DREStech Award in Composite of the American Society for Composites, as well as the Francis Alison Medal and the Medal of Excellence in Composite Materials of the University of Delaware. He served as the North American Editor and then Editor-in-Chief (1985-2019) of the international journal Composite Science and Technology. He has been recognized by ISI as one of the “Highly Cited Researchers” in the world and has been named among top 100 materials scientists (ranked 34th) of the past decade (2000-2020) by Times Higher Education. Dr. Chou has been honored as a World Fellow by the International Committee on Composite Materials.

Patsy Howaniec  
Human Resources  

Certainly my retirement celebration held in December 2019 and attended by the UD friends and colleagues that I cherish is the most recent favorite memory but I would also like to share another: In 2010, I was asked by the Dean to create and lead a HR hub for the College. This hub would have responsibility for all the HR transactions of a house on South College Avenue. Classes were either MWF or TRS. The English department had no adjunct faculty only full-time positions. Undergraduate enrollment was about 6,500, although like most colleges and universities at the time, Delaware had seen campus protests over the Vietnam War. Following the assassination of Rev. King, the National Guard had occupied Wilmington for nine months. Hired as a specialist in Renaissance literature and language, I taught several English literature courses: 13-year history as a Department administrator serving under a variety of titles, 1983–1986 Dean (acting), 1985–2019 Director of Composition, Director of Undergraduate Studies, Director of the Writing Program, Associate Chair (3 times), and Chair of the Department. MEMORABLE EXPERIENCES AT UD...

Richard Heck’s winning of the 2010 Nobel Prize. It was an honor to interview this humble UD professor and report on the groundbreaking chemistry he discovered that has had such a global impact, advancing the manufacture of life-saving medicines to modern electronics. His Nobel Prize affirmed for the world that UD is a great place for education and innovation.

I know that Dr. Maya Angelou spoke at the Bob Carpenter Center just a few years before she passed away, but one of my all-time favorite memories is actually from the mid-1980s when Dr. Maya Angelou spoke at the Perkins Student Center. There were perhaps 100 of us in the audience, and she sang “Wade in the Water,” quite spontaneously. It was electrifying.

At the May hooding ceremony, I told my student Virginia Johnson "Now that you've graduated, Ginny, you should call me Bob." She smiled. "Bob, now that I’ve graduated, you may call me Dr. Johnson."

I have always enjoyed the opportunity to get out and meet our users, whether it’s for in-person support or demonstrating new applications at the Tech or Employee Benefits Fair. Each opportunity presents a chance to learn more about my co-workers, users and the University.

As a grad student in biology in 1975 meeting a student in 205 Drake Hall who later would be my wife. We are now starting our retirement leaves together.

I have always enjoyed the opportunity to get out and meet our users, whether it’s for in-person support or demonstrating new applications at the Tech or Employee Benefits Fair. Each opportunity presents a chance to learn more about my co-workers, users and the University.

I have always enjoyed the opportunity to get out and meet our users, whether it’s for in-person support or demonstrating new applications at the Tech or Employee Benefits Fair. Each opportunity presents a chance to learn more about my co-workers, users and the University.

I love working at the University. It’s too hard to choose just one memory! 35 years have gone too fast.

I have always enjoyed the opportunity to get out and meet our users, whether it’s for in-person support or demonstrating new applications at the Tech or Employee Benefits Fair. Each opportunity presents a chance to learn more about my co-workers, users and the University.

I have always enjoyed the opportunity to get out and meet our users, whether it’s for in-person support or demonstrating new applications at the Tech or Employee Benefits Fair. Each opportunity presents a chance to learn more about my co-workers, users and the University.

MEMORABLE EXPERIENCES AT UD...

Debbie Hendrickson
Making new friends.

Angela Hoseth
My favorite memory is from May 2015 when I received a Master’s Degree in Educational Technology from the University of Delaware. The tuition waiver is one of the greatest benefits of working at UD. My husband used it to complete a PhD in Climatology in 1998 and now my son is a freshman in the Horn Entrepreneurship program.

Maureen Koeller
I don’t have any one memory, I’ve had many experiences working here.

Nancy Nelson
I don’t have a specific favorite memory, but I value the deep and lasting friendships that I’ve developed with my colleagues over the past 30 years.

Linda Olsen
Working on the conversion from the Development Office’s mainframe Advance program to the client/server version was the most difficult yet most satisfying time I spent at UD. I learned a tremendous amount about our database that was applicable even when we later converted to the web based version of Advance.

Ali Pooreni
Faculty advisor for the Blue Hen Chapter of CMAA; Patient Experience Academy with a mission to bring hospitality to healthcare; I am most honored to receive the University’s Excellence in Advising and Mentoring Award with a visible tribute, a named brick, placed at the UD’s Mentors’ Circle, providing me with a feeling of a fulfilling career at the UD.

Diane Pugh
My favorite memory is working with work-study students. I have witnessed the success of the young people and watched them grow in the four years spent at University of Delaware. I have seen students commissioned as officers in the United States Army, become doctors, college coaches, and become employed in the business world.

Chandra Reedy
Preparing my first online class (many years before Covid-19 made those necessary), when I discovered how much assistance UD provided to help faculty learn this skill and develop good courses -- that we didn’t have to do it all on our own! I got help from professional staff at PCS, IT-ATS, CTL, IT-Media Services, and others -- and all of that help continues!

MEMORABLE EXPERIENCES AT UD...

David Shearer
A memorable moment is the end of year luncheons my family and I put on for our HVAC Technicians in Facilities. Being a new manager at the time, I wanted to do something for my team to show how appreciated their hard work and dedication was through the year. It was a festive time that is talked about often by those who were there. Co-workers make UD memorable.

30 Years

Kenneth Wassmer
My memory working with high school and undergraduate student interns. The internship was the first work experience for many. I enjoyed watching them progress and develop good work ethic. It has been a pleasure to see them pursue higher education at the top universities in the country and becoming to be professors, medical doctors, engineers, scientists, etc.

30 Years

Teclemariam Weldekidan
A memorable moment is the end of year luncheons my family and I put on for our HVAC Technicians in Facilities. Being a new manager at the time, I wanted to do something for my team to show how appreciated their hard work and dedication was through the year. It was a festive time that is talked about often by those who were there. Co-workers make UD memorable.

30 Years

Tracy Wootten
The people I have had the privilege to work with and meet during my career—so rewarding.

30 Years

Kimberly Yackoski
From being “on the road” recruiting undergraduates all over the world for Admissions before we had computers and GPS, to serving as an Assistant Dean, the memories that stick with me the most are the people. You know who you are. To the friendships and all the many laughs that kept us moving forward, I feel so blessed and fortunate to call UD my 2nd home.

30 Years

Marianne Johnson
One of my favorite memories is the excitement each year of preparing for convocation & commencement and the pure joy on the faces of students and their families, especially the parents who I’ve have gotten to know during the time their student has been with us.

30 Years

James Kaden
The great coaches and University of Delaware students I have had the pleasure of working with and going to the NCAA Football Playoffs as football operations manager for Coach Raymond.

30 Years

Francis Kwansa
Going into class on Halloween dressed up as a woman and announcing to the class that I was substituting for Prof. Kwansa.

30 Years

Maureen Koeller
One of my favorite memories is the excitement each year of preparing for convocation & commencement and the pure joy on the faces of students and their families, especially the parents who I’ve have gotten to know during the time their student has been with us.

30 Years

Linda Magner
One of my favorite memories is the excitement each year of preparing for convocation & commencement and the pure joy on the faces of students and their families, especially the parents who I’ve have gotten to know during the time their student has been with us.

30 Years

Patrick McDermott
The great coaches and University of Delaware students I have had the pleasure of working with and going to the NCAA Football Playoffs as football operations manager for Coach Raymond.

30 Years

Marcia Miller
One of my favorite memories is the excitement each year of preparing for convocation & commencement and the pure joy on the faces of students and their families, especially the parents who I’ve have gotten to know during the time their student has been with us.

30 Years

Nancy Nelson
The great coaches and University of Delaware students I have had the pleasure of working with and going to the NCAA Football Playoffs as football operations manager for Coach Raymond.

MEMORABLE EXPERIENCES AT UD...

25 Years
Ellen Lepine
Working in the Treasurer’s Office with Roby, Martha, Suzanne, Missy and Terry.

25 Years
Belinda Orzada
Many of my favorite memories are of watching my students bloom as designers, gaining confidence and skill, as they go through the sequence in our apparel design undergraduate curriculum.

25 Years
Breck Robinson
Lunchtime basketball with faculty, staff and students.

25 Years
Tamara Smith
My favorite thing about UD is the people. I love working with the staff, students and faculty. In recent years I have enjoyed the opportunity to work with students and faculty while traveling with their ensembles abroad and have enjoyed a trip to China with our Orchestra in 2018 and Spain with our Wind Ensemble in 2019.

Stephanie Stenkamer
I worked at UD for 16 years before taking time off to stay at home with my children. Thirteen years later, I came back when the oldest started college. My first impression upon coming back to the office was laughter! Everyone was happy, helpful, and excited about being at work. When I think of working at UD, I think of the great people who surrounded me.

25 Years
Deborah Steinberger
Teaching my French Theater Workshop class.

25 Years
David Teague
I will always remember the dedication of the 19 Questions Public Poetry Mural on the wall of Saints Andrew and Matthew Church in Wilmington, written, designed, fabricated and installed by UD Associate in Arts students and their partners: SsAM church, the Creative District, the UD Community Engagement Initiative, and the UD Partnership for Arts and Culture.

25 Years
Gary Weaver
My favorite UD memories include the many opportunities to meet and talk with people—students, colleagues, and many others—from all over the world, plus taking small groups of graduate students on many study-abroad programs that provided interaction with faraway people in their everyday workaday worlds.

Memorable Experiences at UD...

Polly Weir
It isn’t possible to hone it down to one memory. My favorite moments have been working with my team to pull off complex signature events like Alumni Weekend. I have the best team in the world!

Dawn Yasik
Some of my fondest memories at UD are from my early years in Chemical Engineering, where the faculty expressed appreciation to the staff with gifts at various holidays. Possibly, the most memorable was the time Dr. Fraser Russell brought everyone fresh orchid leis from Hawaii!

Lisa Zanolini
The ResNet Conferences for many years with colleagues. This allowed me to meet other IT professionals, build working relationships with other Universities, share what we were doing at UD, and bring new ideas back to UD to be more efficient.

Robin Andersen
It is hard to think of one. I have many fond memories of working with my students and collaborating with my many wonderful colleagues.

Stephen Bunville
Designing and overseeing the boiler room control panel with new devices and seeing it work.

Daniel Coyle
It was a rainy night in February and I had just started at the university. I had only been here about 6 to 8 weeks. My partner on midnights had called out that night and was not there. I was heading north coming over the bridge by the train station and watched the whole campus lose power all at once. My heart dropped.

Cole Galloway
I love when the babies and families involved in my lab’s research drop by campus ‘just to visit’. During their visit, we have time to catch up on life and family – and get some hugs! We also get to hear how important Go Baby Go research is to their family, how often they think of us, and what they can do for us... wow.

Javier Garcia-Frias
My favorite UD memories include the many opportunities to meet and talk with people—students, colleagues, and many others—from all over the world, plus taking small groups of graduate students on many study-abroad programs that provided interaction with far-away people in their everyday workaday worlds.
MEMORABLE EXPERIENCES AT UD…

20 Years

Anthony Goldston
Seeing alumni come back to campus.

Deborah Hall
Over the years everyone I have worked with and/or met have been genuinely kind and caring.

Amy Harter
I have enjoyed the opportunity to support families in our community, supporting students and working in partnership with my amazing team at NDEHS.

Kimberly Hoffman
The first year I worked the Special Olympics in the Field House. Watching the children so happy and wonderful and I look forward to it year.

Christina Johnston
For much of my career I worked in grad student recruitment. Event organizers try to "meet people where they are" and once there was a large grad school fair in the lobby of 30th St. Station in Philly. I met a gal and we chatted about graduate school options. She came to UD for her master’s and doctoral degrees. You never know where UD will take you!

Deborah Steinberger
The people I hired while working in Facilities.

Michele Jones
Delegation!

Gregory Keane
Completing my Master’s Thesis and sharing it with my family, friends, coworkers, and students!

MEMORABLE EXPERIENCES AT UD...

Jennifer (Jenny) Lambe
My favorite memories are from when former students send me links to news articles or videos that made them think of me and our classes together. I love that they are still interested in and engaged with the material enough to reach out.

Crystal Maccari
Obtaining my Bachelor’s Degree while working at UD.

Adam Marsh
Working with students in remote field locations (from Antarctica to Little Cayman) gave me a much better perspective on who they were as adults, and what they could accomplish as future colleagues, than I would ever have learned about them from just working in a laboratory. Those teaching and research experiences are truly memorable for me.

Shelly McCoy
Watching the progression of space changes on campus and in the Library.

A life well spent: from Summer College—many students first college experience, to IT User Services encouraging staff mastery of Microsoft skills like Mail Merge and Excel formulas, through appointments with IT-ATS and ADVANCE Institute helping faculty with teaching and career development support, my work has always been compelling, and hopefully, impactful.

MEMORABLE EXPERIENCES AT UD...

MELISSA SARVER
AVP Al Roberson calling me on my birthday and singing “Happy Birthday to you.”

MARK SERVA
Teaching students and working with my colleagues.

LINDA SMITH
Creating programs and learning opportunities for faculty and staff whilst bringing them together to do their best work and to help them be at their best has been very rewarding.

SHARON TURNER
I have volunteered to work each year at Commencement in the “robing room” where we prepare the platform party for the procession and ceremony. Having had the opportunity to meet the Commencement speakers, Honorary Degree recipients and many faculty and senior leaders - a truly spirited and celebratory day!

FRANK WARREN
One of my favorite memories is at a time of great sadness. I remember the attacks on the World Trade Centers, the Pentagon, and the plane crash in PA on 9/11. I remember how somber everyone was at the time, but then seeing the University come together to heal and make things better. I got a lot of comfort from just being at the University.

LYNN WORDEN
While I enjoy being a part of all of my students’ academic pathways from New Student Orientation to graduation, one of my favorite memories is developing a semester-long student teaching experience in Athens, Greece, and watching students who had never even traveled before rise to the challenge, thrive and become “global citizens.”
