

## CHEMICAL SAFETY MOMENT

Issue 22 – April 2017

### Wear Lab-Appropriate Clothing

As the weather begins to get warmer, please remember to keep wearing closed-toed shoes and long pants in the lab. The proper clothing will better protect you against broken glass and spilled chemicals. Keep an extra pair of sneakers and an extra pair of pants in your office if think you might forget!

NO

NO

YES!

Also, make sure to wear your lab coats and safety glasses when in the lab, their purpose is to keep you protected. Remember, good safety is good science!

### Spring Cleaning

*EHS lab inspections are only two months away, prepare by cleaning your labs!*

**CAUTION**  
**LAB CLEANUP**  
**IN PROGRESS**

Now is the time to rid your labs and offices of old chemicals, papers, and supplies. Take time to recycle your old papers and clean up your office, also schedule a lab clean up day with your group, it will take no time at all!! For assistance with chemical waste or disposing of out-of-date chemicals, please contact EHS.

Schedule quarterly lab cleanouts as a way to maintain the lab, update chemical inventory, and provide a safe working environment for everyone.

### Bicycles Belong Outside

As the weather breaks and you decide to ride your bike to work, remember that all bikes need to be kept outside on the bike racks. You should never bring a bicycle inside and store it in a building hallway or stairwell, doing so can impede egress during a building evacuation or emergency. Bikes located inside are subject to UDPD removal.
